

Redwood Road; 2350 South to 3500 South

Project Description: **Construction Contractor Assisted Design**

The planned reconstruction (without widening) of Redwood Road from 2350 South to 3100 South will improve safety and traffic flow in the area. The completed project will provide three lanes in each direction with a center turn lane. It will include new curb and gutter, concrete paving, improved drainage and sidewalks. UDOT is using a new type of contract that brings the contractor on board during the design phase to work directly with the roadway designers. The construction contractor assisted design contract saves taxpayer money by helping to reduce design and construction costs.

Total Project Budget: **\$10 million (construction cost)**

Anticipated Schedule:

- Utility relocations began - Fall 2005
- Roadway reconstruction on the east side lanes between 2350 South and 3100 South – March through October 2006
- Roadway reconstruction on the west side lanes between 2350 South and 3100 South – Spring through Fall 2007
- Repaving between 3100 South and 3500 South - Spring 2007

NOTE: Schedule information listed above is estimated and could change without notice based on funding, scheduling constraints, stakeholder issues, and other unanticipated project elements.
